What are the key risks that are specific to the Issuer?

Potential investors should be aware that in the case of the occurrence of one of the below mentioned risk factors the Securities may decline in value and that they may sustain a total loss of their investment. The following risks are key risks specific to the Issuer:

Risks associated with the UniCredit Group's activities in different geographical areas: Despite the Group's business being materially connected to Italy and, therefore, to the state of its economy (Italy accounted for approximately 45% of the Group's revenues in 1Q26, computed as sum of Italy, Germany, Austria, Central & Eastern Europe and Russia) the UniCredit Group is also present in Germany (accounting for approximately 23% of the Group's revenues in 1Q26), in Austria (accounting for approximately 10% of the Group's revenues in 1Q26), in Central & Eastern Europe (accounting for approximately 19% in 1Q26 and covering Czech Republic and Slovakia, Hungary, Slovenia, Croatia, Bulgaria, Romania, Bosnia & Herzegovina and Serbia). UniCredit also has marginal activities in Russia (accounting for approximately 4% of the Group's revenues in 1Q26). The exposure to which has been reduced (including over FY25), since the start of the Ukrainian crisis. The UniCredit Group's geographical spread will also continue to expose it to risks and uncertainties of a varying nature and magnitude affecting each of the various countries in which it operates and which could be more complex in relation to countries outside the European Union. Central and Eastern European countries in particular have historically experienced volatile capital and foreign exchange markets, often coupled with political, economic and financial instability (at present potentially increased due to the Ukrainian crisis). The evolution of the geopolitical landscape remains under continuous monitoring by UniCredit, with current factors including recent and constantly evolving U.S. trade policy decisions, that could have potential implications on global trade relationships both with upsides (e.g. new trade partnerships) and downsides (e.g. impact on export/import) as possible outcomes. This area is at the early stage of evolution and potential impacts, if any, on UniCredit's primary geographies will be duly taken into account as part of the normal processes of the risk management framework. At the date of the Registration Document, the Issuer's presence in Russia exposes it to the specific risks connected to the ongoing Ukrainian crisis. Such risk exposure also requires the Issuer to constantly employ a significant amount of resources

for the dynamic management of risks and ongoing assessment of the possible effects of the geopolitical crisis, while maintaining an overall prudent and sustainable approach to distributions. With regard to the assets and liabilities of Russian subsidiaries, the Group holds investments in Russia mainly through AO UniCredit Bank and its subsidiary OOO UniCredit Leasing.

The line-by-line consolidation determined the recognition of total assets for Euro 6,048 million vs. Euro 5,597 million as of 31 December 2024. The increase in total assets is mainly attributable to the appreciation of Ruble vs Euro compared to 31 December 2024 which more than offsets the decrease in total asset in local currency.

As at December 31 2025, the revaluation reserves, whose treatment envisages the recycling through P&L in case of derecognition of the associated assets and liabilities, are equal to Euro -2,729 million mainly arising from the foreign exchange revaluation reserve resulting from the conversion of assets and liabilities of these companies in EUR; the positive delta for Euro 592 million vs. year-end 2024 (Euro -3,321 million), is mainly due the appreciation of the Russian Ruble over the period.

As of 31 December 2025, the loss of control over AO UniCredit Bank would determine the derecognition of net assets having a carrying value of Euro 6,703 million (also embedding the negative revaluation reserves), with a correspondent negative effect through P&L, in case the events leading to the derecognition would not envisage cash-in receivables; under a regulatory perspective over CET1 capital, the negative effect related to the revaluation Reserves (Euro -2,729 million) is basically neutral since it is already considered according to its nature and sign (also taking into account regulatory filters).

Credit risk and risk of credit quality deterioration: The financial and capital strength, as well as the profitability of the UniCredit Group also depend on the creditworthiness of its customers. An unexpected change in the creditworthiness of a counterparty exposes the Group to the risk of a change in the value of the associated credit exposure, requiring it to be partially or totally written down. Such credit risk is inherent in, and material to, the traditional activity of providing credit. As at March 31, 2026, the value of the UniCredit Group's non-performing exposures ("**NPEs**") was equal to Euro 11.9 billion (with a gross NPE ratio of 2.6%), stable Y/Y; the stock of NPE loan loss provisions ("**LLPs**") was equal to Euro 5.5 billion with a coverage ratio of 46%. As at March 31, 2026, the Group's net NPEs stood at Euro 6.5 billion. The UniCredit Group's CoR stood at 17 bps in the first quarter 2026 and Group's overlays on performing exposures was approximately Euro 1.7 billion. The UniCredit Group is also exposed to the non-traditional counterparty credit risk arising in the context of negotiations of derivative contracts and repurchase transactions (repos) on a wide range of products if a counterparty becomes unable to fulfil its obligations towards the UniCredit Group.

Risks associated with the exposure of the UniCredit Group to sovereign debt: The book value of sovereign debt securities exposures of the UniCredit Group as at March 31, 2026 amounted to Euro 133,266 million (Euro 132,977 million as at December 31, 2025) of which over 73% is concentrated in eight countries: Italy (Euro 46,778 million), Spain (Euro 17,160 million), France (Euro 9,164 million), Germany (Euro 8,295 million), Czech Republic (Euro 4,729 million), Austria (Euro 4,543 million), Bulgaria (Euro 3,504 million) and Romania (Euro 3,488 million). Worsening of the spread between the return on government bonds and risk-free benchmark rates, downgrading of a sovereign entity's rating might impact negatively the value of UniCredit's securities portfolio and may be detrimental to the capital position and operating results of the Issuer, although there were no indications of defaults over the course of 2026. The Group's sovereign debt exposure to Russia (Euro 479 million, as of March 31, 2026) is almost totally held by the Russian controlled bank in local currency and classified in the banking book.

In addition to the exposures to sovereign debt securities, loans given to central and local governments and governmental bodies must be taken into account, amounting to Euro 28,033 million as at March 31, 2026 (as at 31 December 2025 it amounted to Euro 28,261 million).

Liquidity risk: The UniCredit Group is and will be exposed to the possibility of being unable to meet its current and future, anticipated and unforeseen cash payment and delivery obligations without impairing its day-to-day operations or financial position. The liquidity risks specific to the activities of UniCredit concern funding/market liquidity and mismatch/contingency risks. As of March 31, 2026, the Liquidity Coverage Ratio ("**LCR**") of the UniCredit Group was equal to 141% whereas at March 31, 2025 it was equal to 143% (calculated as the average of the 12 latest end of month ratios). The LCR as of March 31, 2026 was at c. 140%. As of March 31, 2026, the Net Stable Funding Ratio ("**NSFR**") was 124% whereas at December 31, 2025 it was equal to 125%. The Loan to Deposit Ratio as of March 31, 2026 was at ca. 87%.

Risks associated with capital adequacy requirements: Following the results of the SREP 2025, capital requirements to be met by UniCredit involve a P2R at 200 bps (minimum of 1.13% as CET1 capital and 1.50% as Tier 1 capital), a leverage ratio P2R (P2R-LR) of zero and no additional liquidity requirements. As of January 1, 2026, UniCredit is required to meet: (i) OCR at 10.20% in terms of CET1 ratio, at 12.08% in terms of Tier 1 ratio and 14.58% in terms of Total Capital ratio based on the Systemic Risk Buffer and Countercyclical Capital Buffer as of March 31, 2026 which are updated on a quarterly basis, and (ii) OLRR at 3% on a consolidated basis. As of March 31, 2026, consolidated CET1 Capital, Tier 1 and Total Capital ratios were equal to, respectively: 14.19%, 16.18% and 18.79%, while the LRE was 5.17%. All in all, the outcome of the 2025 SREP as summarized by the P2R is in line with previous years' assessment, and there are no other impacts stemming from that relating to 2025. Furthermore, following the communication received by the SRB and the Bank of Italy in April 2026, UniCredit is required to comply, on a consolidated basis, with: (i) MREL requirement equal to 22.67% of RWAs – plus the applicable Combined Buffer Requirement (the "**CBR**") – and 6% for Leverage Ratio Exposures ("**LRE**"); and subordinated MREL (i.e., to be met with subordinated instruments) equal to 14.36% of RWAs plus the applicable CBR – and 6% for the LRE.

Section 3 – Key information on the Securities

What are the main features of the Securities?

Product Type, Underlying and form of the Securities

Product Type: Protection Performance Securities with Cap (Non-Quanto)

Underlying: EURO STOXX® Banks (Price) Index (EUR) (ISIN: EU0009658426 / Reference Price: Closing price).

The Securities are governed by Italian law. The Securities are debt instruments in dematerialized registered form pursuant to the Italian Consolidated Law on Financial Intermediation (Testo Unico della Finanza). The Securities will be represented by book entry and registered in the books of the Clearing System.

The transfer of the Securities operates by registration on the relevant accounts opened in the Clearing System. The international securities identification number (ISIN) of the Securities is set out in Section 1.

Issuance and Term

The Securities will be issued on 26 November 2026 in Euro (EUR) (the "**Specified Currency**") as up to 50,000 Certificates. The Securities have a defined term.

General

The value of the Securities during their term depends mainly on the price of the Underlying. In principle, the value of the Securities rises if the price of the Underlying rises and falls if the price of the Underlying falls.

Interest

The Securities do not bear interest.

Redemption

Provided that no Conversion Event has occurred, the Securities will be redeemed on the Final Payment Date at the Redemption Amount following an automatic exercise.

At the Final Payment Date the Redemption Amount is equal to the Calculation Amount multiplied by the total of (i) the Floor Level and (ii) the Performance of the Underlying (final) multiplied by the Final Participation Factor. The Redemption Amount will not be lower than the Minimum Amount and not higher than the Maximum Amount.

Additional definitions and product terms

Performance of the Underlying (final) means the difference of (i) the quotient of R (final) as the numerator and R (initial) as the denominator and (ii) the Final Strike Level.

R (final) means the Reference Price on the Final Observation Date.

R (initial) means the Reference Price on the Initial Observation Date.

Final Observation Date:	19 November 2029
Calculation Amount:	EUR 1,000.00
Final Participation Factor:	100%
Final Payment Date:	26 November 2029
Final Strike Level:	100%
Floor Level:	100%
Initial Observation Date:	25 November 2026
Maximum Amount:	EUR 1,210.00
Minimum Amount:	EUR 1,000.00

Conversion of the Securities by the Issuer: Upon the occurrence of one or more conversion events (for example, an Index Replacement Event (for example the calculation or publication of the Underlying is indefinitely or permanently discontinued) has occurred and no suitable Replacement Underlying is available or can be determined) (the "**Conversion Event**") the Issuer may convert the Securities and redeem them on the Final Payment Date by payment of the Settlement Amount. The "**Settlement Amount**" is the market value of the Securities, with accrued interest for the period until the Final Payment Date at the market rate of interest being traded at such time for liabilities of the Issuer with the same remaining term as the Securities within ten Banking Days following the occurrence of the Conversion Event, as determined by the Calculation Agent. The Settlement Amount is in any case not less than the Minimum Amount.

Adjustments to the Terms and Conditions: The Calculation Agent may adjust the Terms and Conditions of the Securities if an adjustment event (for example, a certain change to the relevant index concept) (the "**Adjustment Event**") occurs.

Status of the Securities: The obligations of the Issuer under the Securities constitute direct, unconditional, unsubordinated and unsecured obligations of the Issuer, ranking (subject to any obligations preferred by any applicable law (also subject to the bail-in instruments as implemented under Italian law)) *pari passu* with all other unsecured obligations (other than obligations ranking junior to the senior notes from time to time (including non-preferred senior notes and any further obligations permitted by law to rank junior to the senior notes following the Issue Date), if any) of the Issuer, present and future and, in the case of the senior notes, *pari passu* and rateably without any preference among themselves.

Where will the Securities be traded?

Admission to trading: No application for the Securities to be admitted to trading on a regulated market has been made.

Listing: Application to trading will be made with effect from 3 December 2026 on the following multilateral trading facilities (MTF): EuroTLX, organized and managed by Borsa Italiana S.p.A. ("**EuroTLX**")

UniCredit Bank GmbH (the "**Market Maker**") undertakes to provide liquidity in accordance with the market making rules of EuroTLX, where the Securities are expected to be traded. Moreover, the Market Maker undertakes to apply, in normal market conditions, a spread between bid and offer quotes not higher than 1.00%.

What are the key risks that are specific to the Securities?

Credit risk of the Issuer and risks in relation to resolution measures in relation to the Issuer: The Securities constitute unsecured obligations of the Issuer vis-a-vis the Security Holders. Any person who purchases the Securities therefore relies on the creditworthiness of the Issuer and has, in relation to his/her position under the Securities, no rights or claims against any other person. Security Holders are subject to the risk of a partial or total failure of the Issuer to fulfil obligations which the Issuer is liable to perform under the Securities in whole or in part, for example, in the event of the Issuer's insolvency. The worse the creditworthiness of the Issuer is the higher is the risk of a loss. In the case of realization of the credit risk of the Issuer the Security Holder may sustain a total loss of his/her capital, even if the Securities provide for a Minimum Amount at their maturity. Moreover, Security Holders may become subject

to resolution measures in relation to the Issuer if the Issuer is failing or likely to fail. The obligations of the Issuer under the Securities are not secured, guaranteed by third parties or protected by any deposit protection or compensation scheme.

Risks related to market value-influencing factors: The Security Holders bear the risk that the market price of the Securities may be subject to severe fluctuations during the term of Securities and that the Security Holder is not able to sell the Securities at a specific time or for a specific price. The market value of the Securities as well as the amounts distributable under the Securities primarily depend on the price of the Underlying. However, the market value of the Securities will be affected by a number of additional factors. These are inter alia the creditworthiness of the Issuer, the relevant prevailing interest and yield rates, the market for similar securities, the general economic, political and cyclical conditions, the tradability and, if applicable, the remaining term of the Securities as well as additional Underlying-related market value-influencing factors.

Risks related to the Redemption Amount: The Securities will be redeemed at their maturity at the Redemption Amount. The Redemption Amount may be less than the purchase price. This means, the Security Holder only achieves a return if the Redemption Amount exceeds the individual purchase price of the Security Holder. A participation in a favourable performance of the Underlying beyond the Maximum Amount is excluded.

Risks arising from missing ongoing payments: The Securities do not bear interest or grant any other conditional or unconditional rights for ongoing payments which could compensate possible losses of principal.

Risks related to the regulation of benchmarks: The Securities make reference to a Benchmark (the "**Benchmark**") within the meaning of Regulation (EU) 2016/1011 (the "**Benchmark Regulation**") and therefore there is a risk that the Benchmark may not be used as reference value of the Securities from a certain point in time. In such event, the Securities could be de-listed, adjusted, converted or otherwise impacted. Any changes to a Benchmark as a result of the Benchmark Regulation could have a material adverse effect on the costs of refinancing a Benchmark or the costs and risks of administering or otherwise participating in the setting of a Benchmark and complying with the Benchmark Regulation. Potential investors should be aware that they face the risk that any changes to the relevant Benchmark may have a material adverse effect on the value of and the amount payable under the Securities.

Risks related to indices: The performance of Securities linked to indices depends on the performance of the respective index. Changes in the price of the components of the index and changes to the composition of the index or other factors may have an adverse effect on the performance of the index.

Risks related to potential conflicts of interests: Conflicts of interest in relation to the relevant Issuer or the persons entrusted with the offer may arise, which may result in a decision to the Security Holder's disadvantage.
