Let the bank account (in IBAN format): GR1601101250000000012300695

1. The first four characters "GR16" are moved to the end of the number, so the account number becomes $01101250000000012300695 G R 16$.
2. The letters are translated into numbers, according to the following table, so the account number becomes 01101250000000012300695162716.

| Alphabet to numbers translation table. |  |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
| $\mathrm{A}=10$ | $\mathrm{G}=16$ | $\mathrm{M}=22$ | $\mathrm{~S}=28$ | $\mathrm{Y}=34$ |
| $\mathrm{~B}=11$ | $\mathrm{H}=17$ | $\mathrm{~N}=23$ | $\mathrm{~T}=29$ | $\mathrm{Z}=35$ |
| $\mathrm{C}=12$ | $\mathrm{I}=18$ | $\mathrm{O}=24$ | $\mathrm{U}=30$ |  |
| $\mathrm{D}=13$ | $\mathrm{~J}=19$ | $\mathrm{P}=25$ | $\mathrm{~V}=31$ |  |
| $\mathrm{E}=14$ | $\mathrm{~K}=20$ | $\mathrm{Q}=26$ | $\mathrm{~W}=32$ |  |
| $\mathrm{~F}=15$ | $\mathrm{~L}=21$ | $\mathrm{R}=27$ | $\mathrm{X}=33$ |  |

3. The account number 01101250000000012300695162716 is divided by 97 .
4. If the modulo (remainder after the integer division) is 1 , then the initial account number is a correct IBAN format; else this is not an IBAN account number.

## Warning!

The initial 27 -digit IBAN account becomes a 29 -digit number. This 29 -digit must be divided by 97 , otherwise the validation is wrong.
