

**ENVIRONMENTAL POLICY**

Alpha Supporting Services acknowledges its responsibility and obligations towards environment and mankind, and therefore has developed and implements an Environmental Management System according to EN ISO 14001:2015 International Standard.

Moreover, Alpha Supporting Services is committed to:

- Continuously improve its Environmental Management System, thus ensuring a high environmental performance,
- Prevent and reduce pollution originating from its activities and services,
- Sustainable use of natural resources and mitigation of climate change impacts
- Comply with all applicable environmental legislation and requirements of its licenses
- Assess its suppliers' compliance with Environmental criteria

Alpha Supporting Services, through the implementation of its Environmental Management System, has identified all the environmental aspects-impacts of its activities and has developed processes and programs to continuously improve its environmental performance.

Alpha Supporting Services, focuses on:

- Solid waste management, giving priority to separate collection at source and recycling.
- Energy saving through the development of a monitoring system for natural resources' utilization
- Good ambient and indoor air quality in the context of both, health and safety conditions as well as environmental protection
- Constant updating of administration and staff on environmental issues and conducting training seminars for Alpha Supporting Services personnel.

This Environmental Policy is published and communicated within Alpha Supporting Services and among its stakeholders, while it is implemented and supported by all employees.
